SUMMARY

Third-year Computer Engineering student at the Polytechnic University of the Philippines (Web & Mobile Systems specialization) seeking an IT Internship. Hands-on experience diagnosing and resolving hardware, software, and network issues, maintaining systems and devices, and supporting end users, alongside full-stack web development. Comfortable with Windows OS installation, troubleshooting, basic networking, and version-controlled team workflows, and eager to grow in IT support, systems administration, and IT security.

TECHNICAL SKILLS

- **IT Support & Troubleshooting:** diagnosing and resolving hardware and software issues; preventive maintenance of desktops, laptops, printers, and peripherals; walk-in and end-user technical support
- **Networking Fundamentals:** LAN/Wi-Fi/internet troubleshooting, basic cabling and IP configuration, familiarity with routers, switches, and access points
- **Systems & Software Maintenance:** Windows OS installation, configuration, and updates; development-environment and device setup and upkeep; MS Office
- **Full Stack Development:** React, TypeScript, PHP, MySQL, Node.js/Express, Python
- **IT Security Awareness:** access, backup, and version-control best practices (Git/GitHub); IT activity logs and system configuration records
- **Soft Skills & Languages:** client service, cross-functional teamwork, stakeholder coordination; English (Fluent), Filipino (Native)

EXPERIENCE

Document Services & Large Format Production Assistant **07/2026 – 09/2026**

KNJ Printing — School/Office Publishing Services *Infanta, Quezon*

- Set up, operated, and troubleshot printing and binding equipment for daily walk-in requests, diagnosing hardware faults and resolving them on the spot to keep same-day turnaround on track
- Maintained and configured large-format printing hardware for tarpaulins, vinyl stickers, standees, wall murals, posters, backlit displays, and vehicle wraps, handling output and equipment issues directly on the shop floor
- Edited sermon recordings in Adobe Premiere, applying software proficiency to a real production workflow

Team Leader, Full Stack **01/2026 – 05/2026**

Xontrix — Integrated Electronics E-Commerce & AI-Powered Business Management Platform *Manila, Philippines*

- Set up, configured, and maintained development environments and devices across the team, resolving hardware and software issues to keep workflows on schedule
- Maintained version control standards (Git/GitHub) with backups and a traceable file structure, and documented technical issues, configurations, and resolutions for team reference

President **08/2025 – 08/2026**

PUP Seeds of the Nations (PUP SONS) *Manila, Philippines*

- Coordinated with an external IT Consultant from Deloitte to plan and run a Python Mentorship Workshop, managing logistics and stakeholder communication
- Led timelines and communication across officer committees for technical and community initiatives
- Scoped requirements and documentation for Harvest, an automated member-tracking platform, bridging operational and technical needs

PROJECTS

SafeBite | Food Safety Bacteria Scanner **Harvard CS50P Final Project**

- Built and tested a Python/PyQt6/OpenCV application, including installation, configuration, and troubleshooting across the development environment

EDUCATION

Polytechnic University of the Philippines **08/2024 – Present**

BS Computer Engineering, Web & Mobile Systems Specialization Manila, Philippines
