ABOUT

Third-year Computer Engineering student at the Polytechnic University of the Philippines (Web & Mobile Systems specialization), building a career across full-stack development, IT support/infrastructure, and networking. Hands-on experience diagnosing and resolving hardware, software, and network issues, maintaining systems, and supporting end users — with an active focus on hardware, networking, and systems administration as groundwork toward a future in maritime / shipboard IT. Comfortable with OS installation, troubleshooting, basic networking, and full-stack web development, with strong readiness to grow into IT security and systems administration.

SKILLS

- IT Support & Troubleshooting — diagnosing and resolving hardware and software issues; preventive maintenance of desktops, laptops, printers, and peripherals; walk-in and end-user technical support
- Networking Fundamentals — LAN/Wi-Fi/internet troubleshooting, basic cabling and IP configuration, familiarity with routers, switches, and access points
- Systems & Software Maintenance — Windows OS installation, configuration, and updates; development-environment and device setup and upkeep; MS Office
- Full Stack Development — React, TypeScript, PHP, MySQL, Node.js/Express, Python
- IT Security Awareness — access, backup, and version-control best practices (Git/GitHub); IT activity logs and system configuration records
- Client & Team Support — walk-in client service, cross-functional teamwork, stakeholder coordination; English (Fluent), Filipino (Native)

EDUCATION

Polytechnic University of the Philippines *Expected 2028*
BS Computer Engineering, Web & Mobile Systems Specialization

Northern Quezon College Incorporation
ABM Strand — With High Honors, Class & Batch President

Infanta National High School
Special Program in the Arts (Visual Arts) — With High Honors

CERTIFICATIONS & AWARDS

- AI Fundamentals — DataCamp (May 2026)
- Data Literacy — DataCamp (May 2026)
- AI-Powered Project Manager Masterclass (Dec 2025)
- School of Leaders 1 — Most Outstanding Awardee

EXPERIENCE

Document Services & Large Format Production Assistant *2026*
KNJ Printing — School/Office Publishing Services

- Set up, operated, and troubleshot printing and binding equipment for daily walk-in requests, diagnosing hardware faults and resolving them on the spot to keep same-day turnaround on track
- Maintained and configured large-format printing hardware for tarpaulins, vinyl stickers, standees, wall murals, posters, backlit displays, and vehicle wraps, handling output and equipment issues directly on the shop floor
- Edited sermon recordings in Adobe Premiere, applying software proficiency to a real production workflow

Team Leader, Full Stack
Xontrix — Integrated Electronics E-Commerce & AI-Powered Business Management Platform

- Set up, configured, and maintained development environments and devices across the team, resolving hardware and software issues to keep workflows on schedule
- Maintained version control standards (Git/GitHub) with backups and a traceable file structure, and documented technical issues, configurations, and resolutions for team reference

President
PUP Seeds of the Nations (PUP SONS)

- Coordinated with an external IT Consultant from Deloitte to plan and run a Python Mentorship Workshop, managing logistics and stakeholder communication
- Led timelines and communication across officer committees for technical and community initiatives
- Scoped requirements and documentation for Harvest, an automated member-tracking platform, bridging operational and technical needs

PROJECTS

SafeBite | Food Safety Bacteria Scanner

Harvard CS50P Final Project

- Built and tested a Python/PyQt6/OpenCV application, including installation, configuration, and troubleshooting across the development environment
